# Going to the dentist shouldn't be anxiety-filled! *And it will not be here....*

Dr. Nalin Patel

Dr. Arpan Patel

The Langhorne area now has the arrival of a new world-class dental practice to celebrate! It's a dentist office with a difference. State of the art equipment and sterilization facilities will provide residents with a new, higher level of personalized, comfortable care. Oxford Valley Dental Excellence also has an exclusive feature: Smile Spa, an in-office spa offering treatments such as laser hair removal, cellulite reduction, Botox and Restylane, as well as massages and facials.

Dr. Nalin Patel and Dr. Arpan Patel, who have been general and cosmetic dentists for over 30 years combined, are ready to provide you with the dental care you deserve. The office is located on Middletown Blvd. across from Oxford Valley Mall in the old "Best building". The office is a high level of excellence with a focus on quality patient relationships and quality patient care. Doctors Patel, who both reside in Newtown, believe that they

can offer the community a total quality dental experience that goes well beyond basic dental care.

The office uses the latest technology in laser dentistry for no drills, no needles, virtually pain free treatment. All aspects of dentistry can be found under one roof here. During appointments, the dentists will incorporate an intra-oral camera that lets patients view their teeth close-up on a television screen right at chair side. This will help patients understand their dental health condition, especially those requiring comprehensive treatment. "Modern technology and personalized care will help the patients stay healthier longer; this will be the best treatment in the long run," explains Dr. Patel. The doctors make patient satisfaction and comfort their top priority, and guarantee their work. They look forward to your visit to their office and to showing you the positive effects quality dental care can have on your life.
